## A Note from Sterling Cut Glass

*Award presentations have always been as much about commemorating a great time as acknowledging a skillful win. At Sterling Cut Glass, we always aim to honor both.*

*We've long understood that your events and presentations are an extension of your image and a reflection of you. That's why we always endeavor to bring you fresh, exciting new ideas and options for recognizing winners and welcoming guests. With over 50 new products in our 2016 lineup including exciting new introductions in porcelain and pewter, our winning streak continues. Presentations guaranteed to make your events – and you – look better than ever!*

*Cheers to a healthy and prosperous 2016 golf season.*

*Thank you for choosing Sterling Cut Glass ... Since 1902.*

*Mike Dyas, President/CEO*

## PRODUCTION TIME

Standard production time is two weeks after an order is received, plus shipping time. All orders require an IN-HANDS DATE in order to be scheduled for production. Orders without a specified date, or "ASAP," will be produced as time and order volume permits. Faster turnaround may be available – please contact your sales or customer service rep for details.

## ARTWORK REQUIREMENTS

All orders should be accompanied by artwork in an acceptable format. We reserve the right to clean up artwork without prior approval if charges do not exceed \$75.

Acceptable File Formats:	Unacceptable File Formats:
<ul style="list-style-type: none"> <li>• .ai (Adobe Illustrator), with fonts outlined</li> <li>• .eps</li> <li>• .pdf</li> </ul>	<ul style="list-style-type: none"> <li>• .gif</li> <li>• .doc (Microsoft Word)</li> <li>• website-copied logos</li> <li>• faxes</li> <li>• embroidery files</li> <li>• pen/ink drawings</li> </ul>
<p><b>ALL FILES MUST BE IN BLACK AND WHITE VECTOR FORMAT</b></p>	

## PGA TOUR, LPGA® AND KENTUCKY DERBY® LICENSING

As an official licensee of the PGA TOUR, LPGA® and the Kentucky Derby®, Sterling Cut Glass is able to offer qualified customers the use of these logos and those of their affiliated events on most pieces in this catalog. Please call for details.

## RETAIL WEBSITE/CATALOG

Our customer-friendly website with RETAIL PRICING may be accessed at [www.sterlingcutglass.com](http://www.sterlingcutglass.com). The website offers online ordering, past order history, invoice payment options and many additional features. In addition, a RETAIL version of our 2016 golf catalog is available on request.

## TRADEMARK

Liability for correct use of a trademark, crest or logo rests with the customer. The logos shown in this catalog represent orders from our customers and are used for illustration purposes only. These logos are the exclusive property of the respective institutions.

## COPYRIGHT

No part of this catalog may be reproduced or utilized in any form or by any means, electronic or mechanical, without the prior written permission of Sterling Cut Glass Company, Inc. Fairway™ and Fore™ products represent registered trademarks of Sterling Cut Glass.

## GUARANTEE

Sterling Cut Glass guarantees all workmanship to be first quality. Because most of our offerings are hand crafted, it is natural for small air bubbles, chill marks, flow lines or slight surface irregularities to appear. These unique variations are not considered defects. We make every effort to select pieces which demonstrate the finest representation of the craft, and to minimize any appearance of these characteristics in or around the etching area. Returns cannot be accepted without prior written authorization.

*Prices in this catalog are effective through 11/30/2016; subject to change without notice.*

## CRYSTAL CARE INSTRUCTIONS

Due to the delicate nature of glass and crystal, hand washing is recommended. Dry with a lint-free cloth to prevent scratching. To avoid breakage, do not expose glass or crystal to extreme temperatures or to abrupt temperature changes.

### GLASS

The process of glassmaking has remained essentially the same since ancient times. Most glass is a mixture of silica, obtained from beds of fine sand or from pulverized sandstone, an alkali to lower the melting point, usually a form of soda or potash for finer glass, lime as a stabilizer and cullet (waste glass to assist in melting the mixture).

The materials are fused at high temperatures in seasoned kilns, boiled down, skimmed, and cooled several hundreds of degrees. The molten glass is ladeled or poured into molds and pressed or blown (sometimes into molds). The shaped glass is annealed to relieve stresses caused by manipulation, then is slowly cooled.

### NON-LEAD CRYSTAL

Non-lead crystal is glass with a high content of potash, yielding weight, clarity and sparkle without adding lead content.

### FULL LEAD CRYSTAL\*

The addition of lead to the glassmaking process yields a product with increased luster, clarity and weight. It is also a slightly softer material than glass, which lends itself well to hand cutting and polishing. Leaded crystal varies in lead composition, but to be considered full lead crystal, the lead content must be 24% or higher. The higher the lead content, the more sparkle is achieved, but more skill is required to form a shape at the blowing stage.

### OPTICAL CRYSTAL

Optical crystal is among the finest of all crystals available. With no lead content, it is clarified to a 100% optically clear state by the addition of barium, which results in a perfectly flawless clear glass that shines brightly under any light source. Optical crystal is manufactured in large thick sheets, and while still molten, is subjected to tremendous pressure to insure no bubbles, flow lines or other distortion. Optical crystal is 100% lead free and extremely hard.

### STARFIRE CRYSTAL

Starfire crystal is a lead-free, low iron product that presents high clarity resembling that of optical crystal, but at lower cost. Highly polished, this material produces a bright white sparkle and is therefore sometimes referred to as "white glass".

### CASED CRYSTAL

24% clear lead crystal is encased in a translucent layer of richly colored crystal. Hand cutting and polishing reveals the clear crystal beneath, resulting in dramatic contrast and sparkle.

### PEWTER

Pewter products are all hand crafted and are food safe, containing no lead. Pewter is a metal alloy consisting primarily of tin. Pewter does not tarnish. Always wash pewter products by hand in warm soapy water and dry with a soft cotton towel.

### REGENCY PORCELAIN

A patented state of the art mixture of ceramic and porcelain, (Keramnext™) yielding the detailed perfection of porcelain and the weight and durability of ceramic. All pieces feature hand applied glazes and 24K gold detailing. To clean, gently wipe with a damp cloth.

## SAND CAST ALUMINUM

Sterling's aluminum products are food safe. Each piece is sand cast and polished from a metal alloy consisting mostly of aluminum. Slight variations in finish and surface texture are the result of this handmade process, and are considered intrinsic to their unique design. The acids in certain foods may cause discoloration. A light coating of vegetable oil prior to use can help prevent this. If polishing or extra cleaning becomes necessary, apply a non-abrasive metal polish and gently buff with a soft cotton cloth.

### SILVER-PLATED

Silver-plated products are genuine silver, plated over brass. Silver plated products are all lead-free and food safe. All silver will tarnish over time, particularly in humid conditions. If polishing is necessary, use a silver polishing compound and gently buff the surface with a soft cotton cloth so as not to erode or scratch plating.

### NICKEL-PLATED

Nickel-plated products are genuine nickel, plated over brass. This durable finish is highly tarnish resistant. To clean, gently buff the surface with a soft cotton cloth.

### COPPER

Our genuine copper-plated products are lead-free and food safe. Tarnish free. If polishing is necessary, gently buff with a damp cloth.

\*Attention California residents. Proposition 65  
WARNING: Consuming foods or beverages that have been kept or served in leaded crystal products or handling products made of leaded crystal will expose you to lead, a chemical known to the State of California to cause birth defects or other reproductive harm.

# Etching Techniques

## LIGHT ETCH

Light etch is a delicate but permanent surface etch. As illustrated, the light etch technique does necessitate small breaks in any enclosed letter or area. When budgetary concerns are paramount, light etching provides a quality, yet economical solution.

Only club crests and logos as well as event name and year may be light etched. Award copy is not available in light etch. The per item minimum for light etch is 36 pieces.

## DEEP ETCH

Deep etch is our highest caliber etching technique, providing the ultimate appearance in etched crystal. Your crest or logo is crisply cut, rendering a detailed and permanent dimensional image.

Please note: Etching will appear deeper in bold open areas of a logo and less deep in fine detailed areas such as copy.
