

STERLING

CUT GLASS

THE DISTILLERY COLLECTION

2022

WHOLESALE PRICING

STERLING CUT GLASS WAS FOUNDED IN 1902 and remains one of the oldest continuously operating glassworks in the USA.

Sterling pioneered and perfected the deep etch sandblasting technique on fine quality glassware and crystal, obtaining a rich, crisply carved effect.

Sterling is the premier custom glass etcher in the United States and offers its customized products at wholesale pricing to distilleries across the country. Many of our offerings are imported from the finest crystal factories in the world, including our exclusive relationship with the renowned Polish Krosno Glassworks.

Sterling is the preferred supplier of custom etched crystal to the golf industry through the PGA of America and is an official licensee of the PGA Tour and the LPGA, as well as the Kentucky Derby and US Tennis Open.

*Thank you for choosing
Sterling Cut Glass.*

We look forward to working with you!

- Great for events and retail!

Pricing Policy

All prices in this catalog are listed at WHOLESAL COST and are available only to qualified buyers, subject to credit approval.

- A discount of 5% on single orders of \$1500 or greater is available when paid within terms.
- A discount of 10% on single orders of \$3500 or greater is available when paid within terms.

Prices in this catalog are effective 10/1/21-11/30/22.
Subject to change without notice.

Placing Orders

Orders may be placed with your Sterling sales representative or by e-mailing spirits@sterlingcutglass.com. Our friendly and knowledgeable customer service representatives are always ready to assist you at 1-800-543-1317, 8:00 am-5:30 pm EST.

Minimum Order

The minimum order is \$100. Orders totaling less than \$100 are subject to a \$10 processing fee. The per item minimum for light etch is 36 pieces.

Payment Terms

Due to the custom nature of our product, first-time orders must be paid in advance. Sterling accepts personal or business checks, as well as Visa, MasterCard, American Express and Discover. Upon credit approval, Sterling can accommodate billing terms of net 30 days. Invoices may be paid online at www.sterlingcutglass.com.

Production Time

Standard production time is 2-4 weeks after an order is received, plus shipping time. All orders require an IN-HANDS DATE in order to be scheduled for production. Orders without a specified date, or "ASAP", will be produced as time and order volume permits. Faster turnaround may be available – please contact your sales or customer service rep for details.

Rush Orders

An order submitted allowing less than the standard production time may be subject to a 10% rush surcharge, plus expedited delivery charges if required.

Proofs

To ensure accuracy of production, proofs will be faxed or emailed on all orders.

Proof Approvals

To ensure on time delivery of your order, proofs must be approved within 48 hours of receipt. Failure to approve proofs within 48 hours may result in delivery delays, expedited shipping charges and rush order charges. **PROMPT PROOF APPROVALS KEEP YOUR ORDER ON SCHEDULE!**

Artwork Requirements

All orders should be accompanied by artwork in an acceptable format. We reserve the right to clean up artwork without prior approval if charges do not exceed \$50.

Enclosures

An extra charge may apply for certain customer-supplied insertions. Please contact customer service for a price quote.

Art & Logo Setup

There is No Logo Setup Charge for artwork submitted under Vector Art Guidelines.

Vector (adobe illustrator (ai), eps or vector pdf)

- Used for logos, text, and illustrations
- Can be scaled to any size without distortion
- Remains sharp at any resolution
- Free logo setup

A vector file is used for the etching process*

*New light etch logos require a \$50 stencil fee

Raster (scanned images, jpgs, tifs, gifs, bmps, or raster pdfs)

- Defined by pixels
- Cannot be scaled without distortion
- Resolution dependent (not clear when resized)
- Logo setup charge \$50
- Highly complex raster images may incur additional charges

In order to maintain the clarity of the art and text, a raster file will need to be redrawn before it can be used in the etching process.

Custom Order Merchandise

Custom items or special order merchandise requires payment in advance (minimum 50% deposit) to initiate the order. Overruns and underruns up to 10% are industry standard. Such orders are non-cancellable. Correctly custom-etched or engraved merchandise is not returnable. Returns of plain merchandise are subject to a 15% restocking fee. Returns are not accepted without prior return authorization.

DECANTER SET BOX

GIFT BOX

Measurements

All capacities and sizes listed in this catalog are approximate.

Opposite Side Etching

Some items allow space for a second side etch (e.g. the opposite side of a drinking glass). Please add a deep etch charge of \$4.00 per glass. In the case of large volume glassware orders, opposite side light etching (where available) may be added for a surcharge of \$1.50 per glass. Please note that set-up charges may apply in addition to the above etching charges.

Shipping and Handling

Orders are shipped prepaid with freight and handling charges added to the invoice. All shipments are F.O.B. Erlanger, KY 41018. Our standard method of shipping is UPS; however, common carrier truck shipments, as well as air freight services are also available. Shipments sent via UPS will be automatically accompanied by a shipping notification via e-mail when an e-mail address is provided. To submit your current e-mail address, please e-mail cs@sterlingcutglass.com. C.O.D. orders are not accepted.

Retail Website/Catalog

Our customer-friendly website with RETAIL PRICING may be accessed at www.sterlingcutglass.com. The website offers online ordering, past order history, invoice payment options and many additional features.

Trademark

Liability for correct use of a trademark, crest or logo rests with the customer. The logos shown in this catalog represent orders from our customers and are used for illustration purposes only. These logos are the exclusive property of the respective institutions.

PROP 65 WARNING

Consuming foods or beverages that have been kept or served in leaded crystal products or handling products made of leaded crystal will expose you to lead – a chemical known to the state of California to cause birth defects or other reproductive harm.

Freight Claims/Breakage

Sterling carefully packages all shipments to ensure safe arrival, using our eco-friendly packing peanuts. In the unlikely event of breakage in transit, Sterling will file the claim with the freight carrier; however, we require your adherence to the following steps:

1. Open immediately upon receipt and inspect all contents.
2. In the event of breakage you must save the outer carton, all packing materials and contents.
3. Report the damage within 48 hours to Sterling's customer service department at 1-800-543-1317.

Following this procedure will help ensure timely replacement of your merchandise. No claims for damage or shortage will be honored after 10 days from receipt of goods. Replacements will be shipped via ground service within 48 hours of the breakage report.

Copyright

No part of this catalog may be reproduced or utilized in any form or by any means, electronic or mechanical, without the prior written permission of Sterling Cut Glass Company, Inc.

Guarantee

Sterling Cut Glass guarantees all workmanship to be first quality. Because most of our offerings are hand crafted, it is natural for small air bubbles, chill marks, flow lines or slight surface irregularities to appear. These unique variations are not considered defects. We make every effort to select pieces which demonstrate the finest representation of the craft and to minimize any appearance of these characteristics in or around the etching area. Returns cannot be accepted without prior written authorization.

ETCHING TECHNIQUES

Deep Etch

Deep etch is our highest caliber etching technique, providing the ultimate appearance in etched crystal. Your crest or logo is crisply cut, rendering a detailed and permanent dimensional image.

Light Etch

Light etch is a delicate but permanent surface etch. As illustrated, the light etch technique does necessitate small breaks in any enclosed letter or area. When budgetary concerns are paramount, light etching provides a quality, yet economical solution.

Diamond Engraving

Diamond engraving uses a non-rotating tool with a cone-shaped diamond tip, which is dragged with pressure through metal, leaving a beautiful impression. Diamond-drag creates quality engraving that compares to hand engraving. The width of stroke is constant and does not vary in depth. Diamond-drag is recommended for soft metals such as silver, copper, pewter, aluminum and nickel.

ColorMark

ColorMark is a durable UV printing process that allows for printing on almost any flat object or surface, which lends itself well to glass, crystal and metal finishes. Printing with UV allows for any logo or copy to be printed at high resolution without limitations or alterations, producing unique and colorful awards and gifts. Products are not dishwasher safe. Clean with ammonia-free cleaner using a soft lint-free cloth.

Laser Engraving

Laser engraving creates a digital "burned" image from a directed laser beam, which vaporizes the substrate material. The resulting image is detailed, permanent and indelible.

Crystal Care Instructions

Due to the delicate nature of glass and crystal, hand washing is recommended. Dry with a lint-free cloth to prevent scratching. To avoid breakage, do not expose glass or crystal to extreme temperatures or to abrupt temperature changes.

Glass

The process of glassmaking has remained essentially the same since ancient times. Most glass is a mixture of silica, obtained from beds of fine sand or from pulverized sandstone, an alkali to lower the melting point, usually a form of soda or potash for finer glass, lime as a stabilizer and cullet (waste glass to assist in melting the mixture). The materials are fused at high temperatures in seasoned kilns, boiled down, skimmed, and cooled several hundreds of degrees. The molten glass is ladled or poured into molds and pressed or blown (sometimes into molds). The shaped glass is annealed to relieve stresses caused by manipulation, then is slowly cooled.

Non-Lead Crystal/Crystalline

Non-lead crystal is glass with a high content of potash, yielding weight, clarity and sparkle without adding lead content.

Full Lead Crystal*

The addition of lead to the glassmaking process yields a product with increased luster, clarity and weight. It is also a slightly softer material than glass, which lends itself well to hand cutting and polishing. Leaded crystal varies in lead composition, but to be considered full lead crystal, the lead content must be 24% or higher. The higher the lead content, the more sparkle is achieved, but more skill is required to form a shape at the blowing stage.

Silver-Plated

Silver-plated products are genuine silver, plated over brass. Silver plated products are all lead-free and food safe. All silver will tarnish over time, particularly in humid conditions. If polishing is necessary, use a silver polishing compound and gently buff the surface with a soft cotton cloth so as not to erode or scratch plating.

Copper

Our genuine copper-plated products are lead-free, food safe and tarnish free. If polishing is necessary, gently buff with a damp cloth.

*Attention California residents. Proposition 65 WARNING: Consuming foods or beverages that have been kept or served in leaded crystal products or handling products made of leaded crystal will expose you to lead, a chemical known to the State of California to cause birth defects or other reproductive harm.
